WXS2030 WXHotAir Basic Set 230V

Item No: T0053176699
900 W Controlled High Power Rework Basic Set

The Ultimate Rework Experience.
As electronics continue to evolve, repair work requires more than just heat. Higher copper content, multilayer circuit boards, and thermally sensitive components demand energy that is not only powerful but also precisely controllable.

WXHotAir is Weller’s high-end, high-power hot-air repair module, designed for demanding applications that require controlled high-power output and stable thermal behavior. With up to 900W of precisely controlled hot air, it enables reliable heat transfer on complex PCBs and PCBs with high copper content while maintaining process stability.

In combination with the WXsmart soldering station, the WXS2030 Set was specifically designed for professional electronics development and production environments and offers high performance in repair work and traceability capabilities.

The WXHotAir features integrated vacuum handling, thermocouple-based temperature monitoring, and

intelligent thermal protection to ensure safe, repeatable, and traceable repair processes.

KEY FEATURES

- High-performance, modular hot-air rework solution for professional electronics manufacturing, repair, and development
- Set includes WXsmart Station, WXHotAir Modul
- Uniform heating without mechanical stress
- Ideal for rework, repairs, and maintenance
- Integration into the WXsmart platform for centralized control, traceability, and modular expansion
- Space-saving, stackable workstation design for structured and scalable work environments
- The optional Windows software offers live sensor tracking, graphical temperature curves, user management, and project-based data storage. These features ensure maximum transparency, safety, and traceability throughout the entire rework process, while enabling reproducible results and remaining easy to use.
- Ideal for use in ESD-protected areas thanks to its antistatic design

TECHNICAL DATA

Tip Range	NQ, NR, NRV, ND, TNR RTWMS, RTWPS RTMS MS, RTPS MS
Traceability	Yes
Works With	WXsmart
Product Family	Rework, Hot Air, Desoldering Stations
